

ROSA

Responsive Observation Security Agent

Meet ROSA, the world's first self-contained security and communication solution from Robotic Assistance Devices. Featuring the launch of our in house developed RADSight which will enhance the human and machine collaboration between ROSA and your staff. Since ROSA is such a compact package it is easy to deploy at almost any location in about 15 minutes making it the fastest deployable security device on the market. ROSA includes RAD's AI-driven security systems including both human and vehicle detection, license plate recognition, and complete integration with the RAD Software suite notification and response library.

- Human detection and autonomous response
- Vehicle detection and autonomous response
- Perimeter intrusion detection, response and alerting
- Audio intervention
- Live stream to mobile app
- Cellular optimized – no WiFi required
- Cloud served – no hardware at client site
- 20+ days recording of all video
- 1-year event recording in cloud
- Audio talk-down
- Snapshot audit
- License plate recognition
Requires specific positioning and RAD's 'BOLO Technologies' platform
- Neon changing per customer SOPs
- LEDs changing on customer SOPs
- Standard 110v power requirement
- 15 minute deployment time
- SPOT™, RAD's exclusive Face Mask Detection System available as part of RAD's Health Screening Option
